REFERENCE: Letter of warning dated June 14, 1990 and letter of
June 25, 1990

Dear Ms. Flournoy:

This letter is in response to your request of June 25, 1990 that we submit a statement of our facility status during calendar year 1989 on our hazardous waste management activities.

We have had a very active waste minimization program here at WCI for the past three years. We averaged 2,750 lbs. of hazardous waste per month in 1988, 550 lbs per month in 1989, and so far this year 440 lbs. per month.

We have eliminated the use of mineral spirits and 1,1,1 Trichloroethane in our cleaning operations. We either eliminated the operations, or substituted a non-hazardous product. We are, therefore, a small quantity generator and not required to submit the 1989 Biennial Report. We submitted another EPA form 8700-12 to Mr. Bowman on June 29, 1990.

Thank you very much.

Sincerely,

Craig Draves
Plant Manager
